Educational Policy Accreditation Standards (EPAS):

Competency-based education is an outcomes-oriented approach to curriculum design. The goal of the outcomes approach is to ensure that students are able to demonstrate the mastery of integration and application of the competencies in practice. In EPAS, social work practice competence consists of nine interrelated competencies and practice behaviors that are comprised of learning activities. The nine core competencies and one professional growth and development activity are listed below followed by a description of characteristic knowledge, values, skills, cognitive/affective processes (listed as Activities To Evaluate Student Mastery of EPAS) and the resulting practice behaviors that may be used to operationalize the curriculum and assessment methods.
